## Montage du Raspberry Pi 4 sur DAC

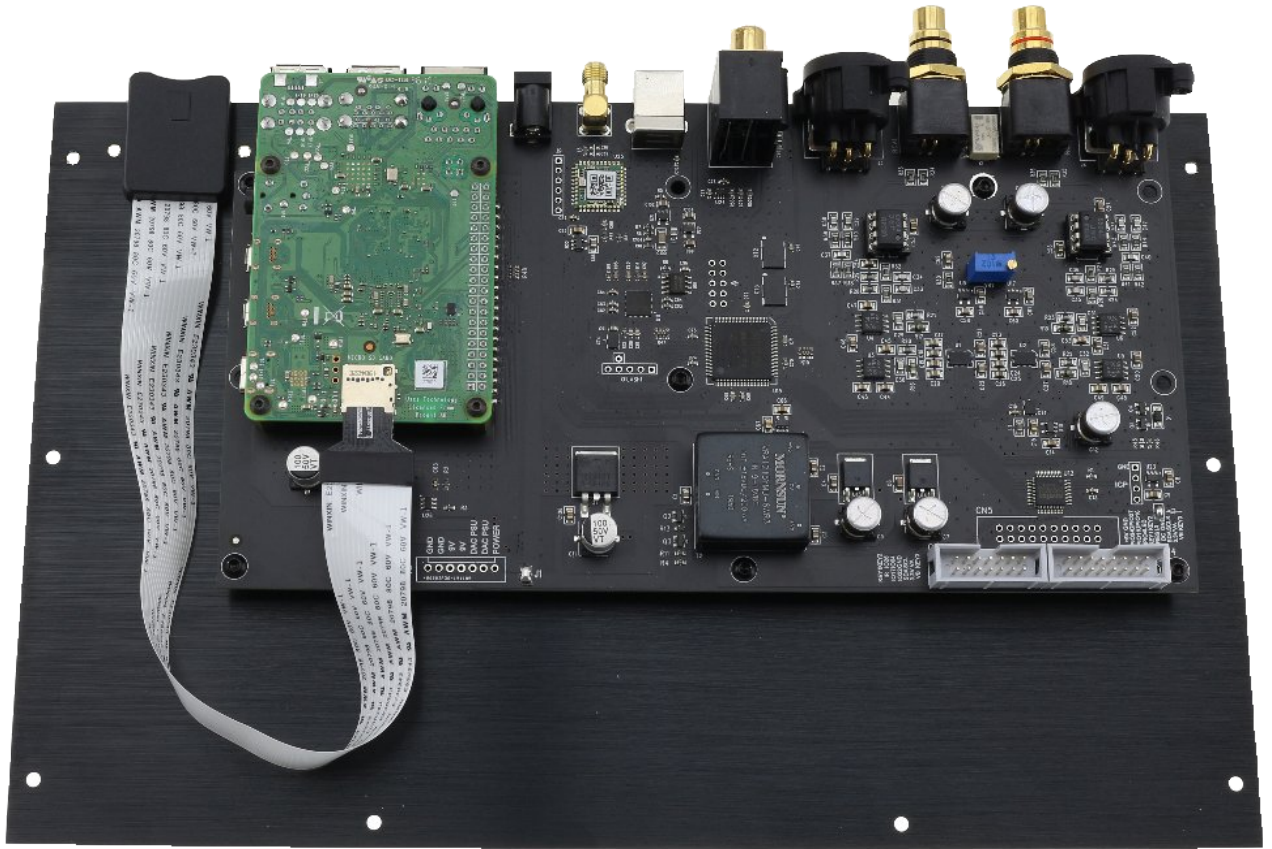

*Mounting RPI 4 on DAC*

## Montage du DAC sur fond du boîtier

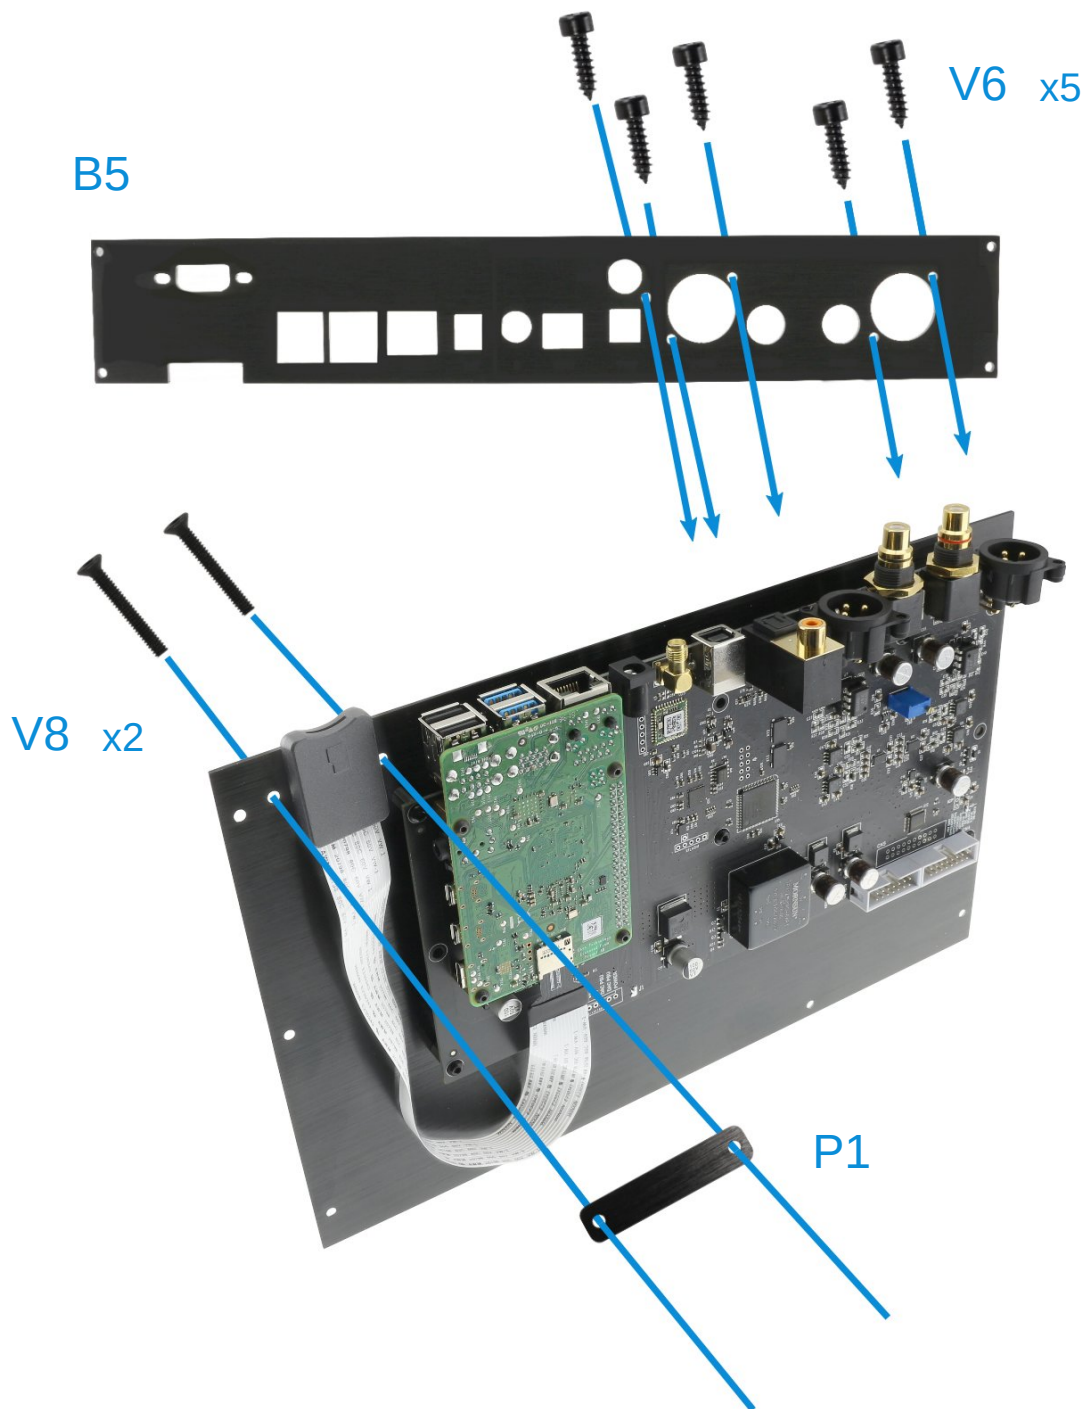

*Mounting DAC on casing bottom plate*

H2 X1

Installation du lecteur de carte SD  
Attention : ne pas plier la nappe H2

*Installing SD card reader  
Do not fold H2 cable*

## Fixation panneaux arrière et support SD

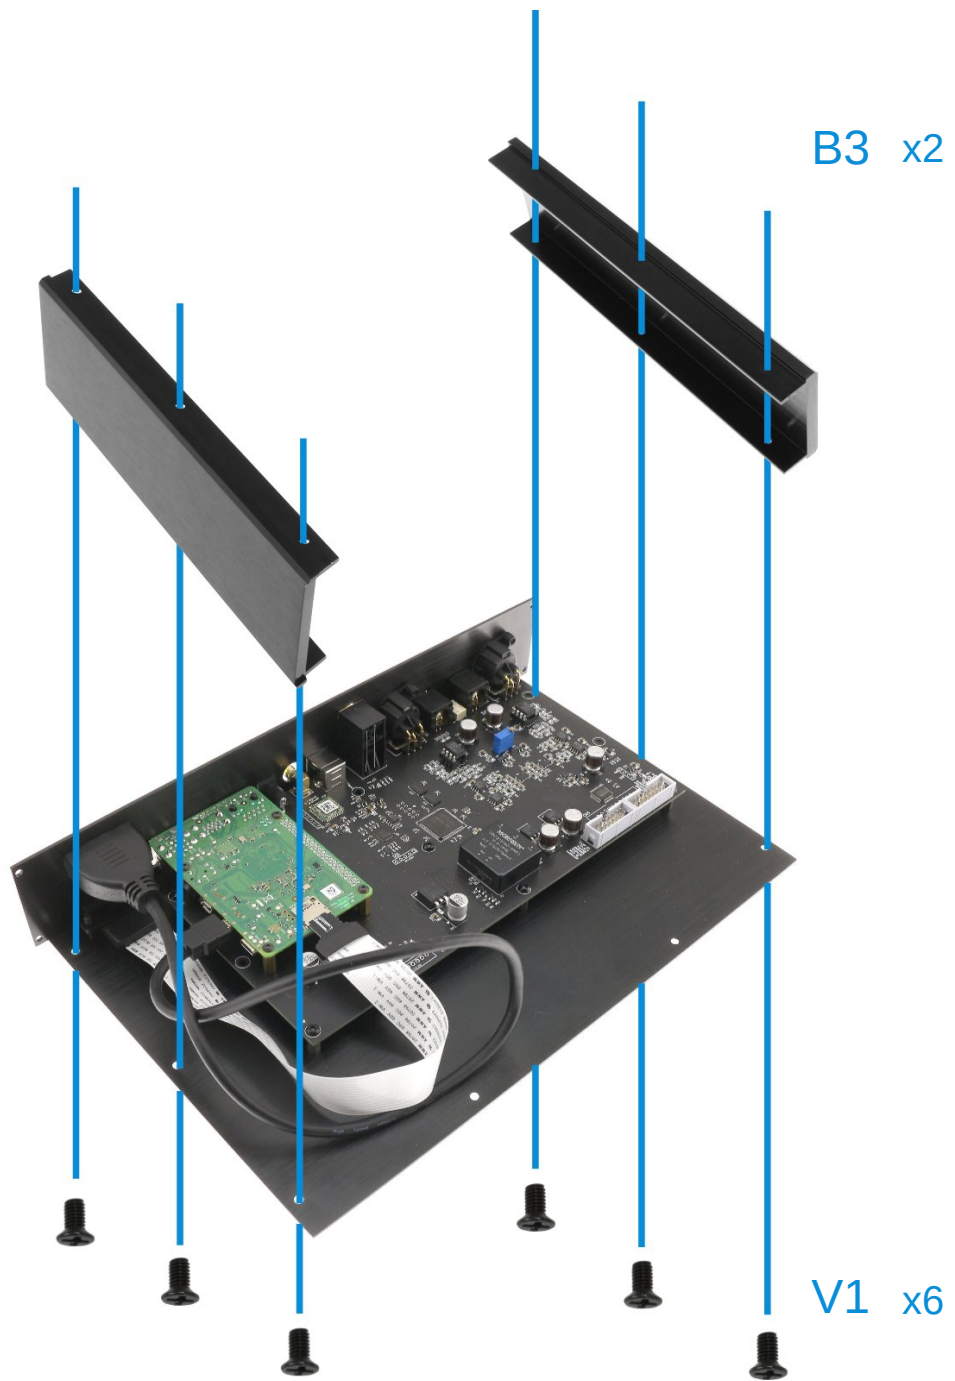

*Mounting back panel and SD connector*

## Installation Antenne Bluetooth & connecteur HDMI

*Installing Bluetooth Antenna and HDMI connector*

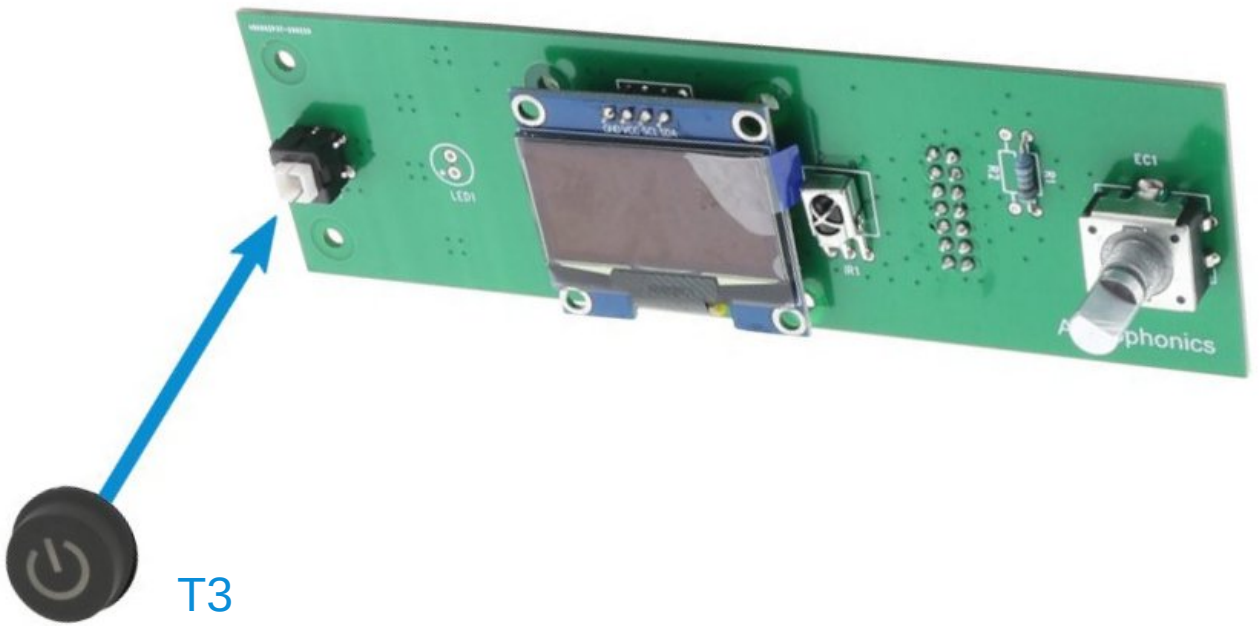

## Montage des panneaux extérieurs

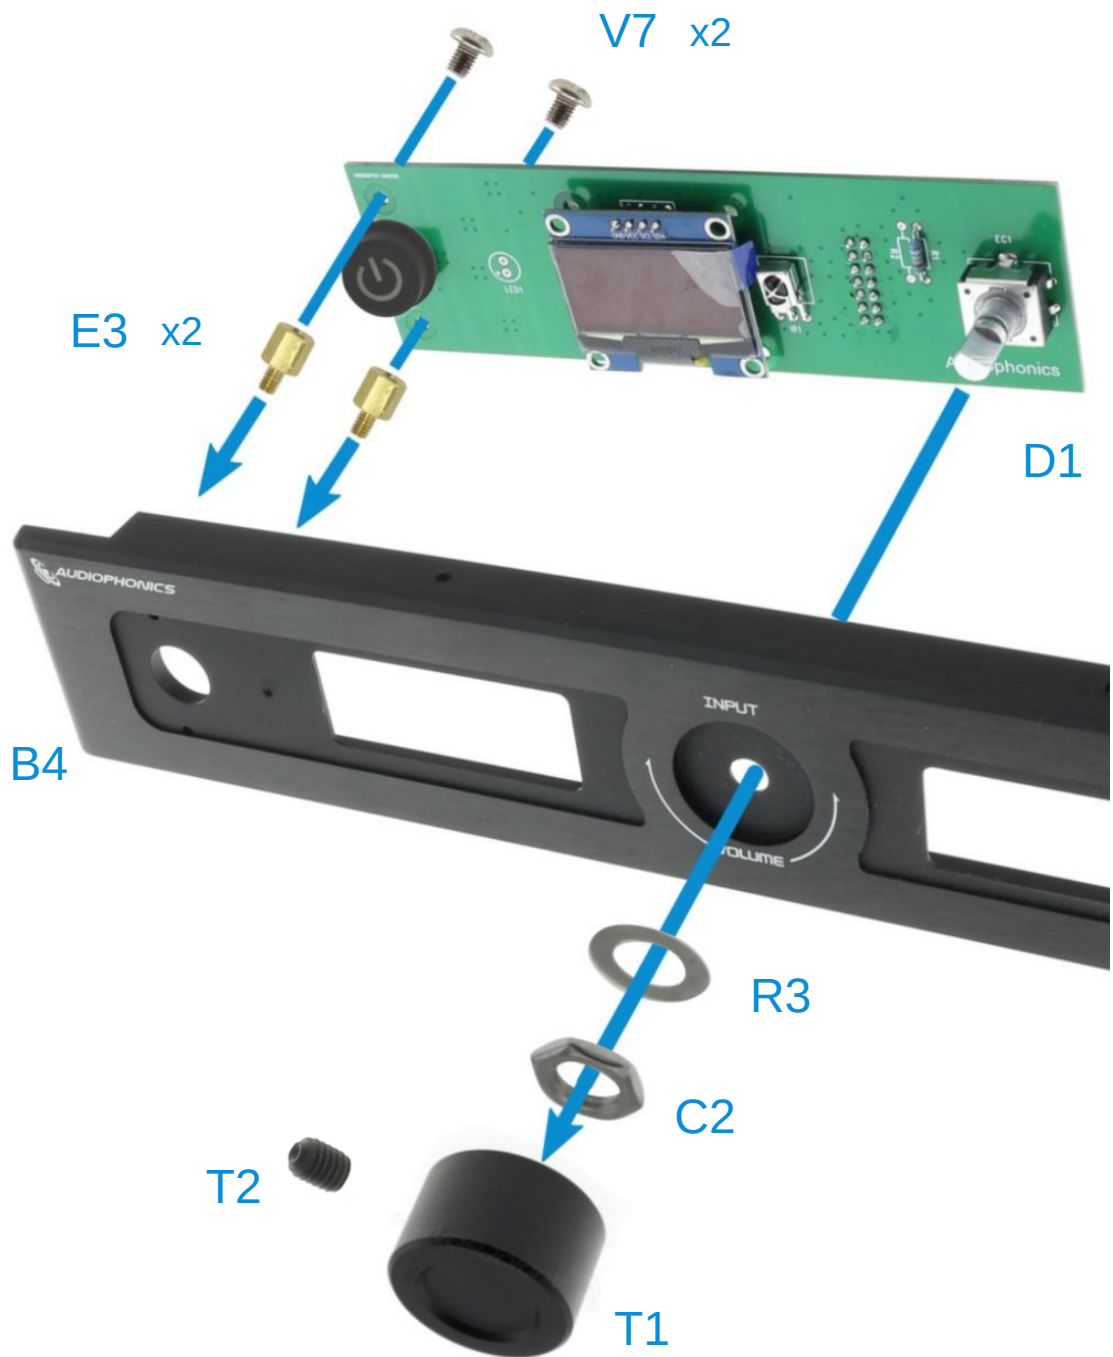

*Mounting side panels*

D1

Installation du bouton On /Off

*Installing On/Off Button*

## Montage du PCB écran 1 en façade

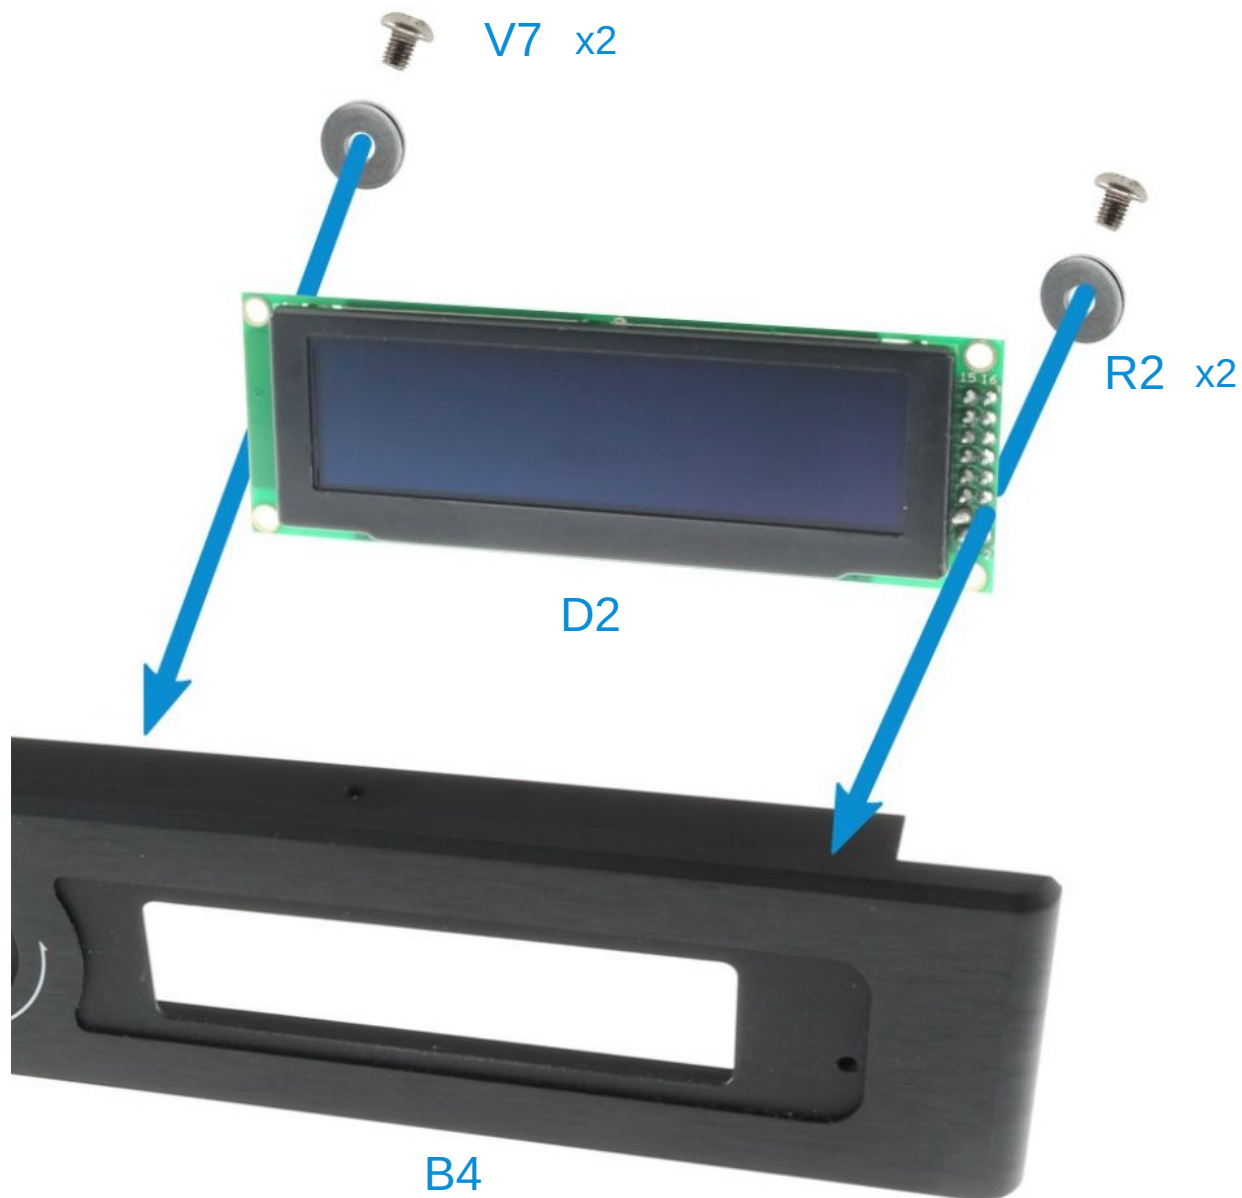

Avant de serrer les vis, vérifiez que l'écran est centré et ne touche pas les parois du boîtier

### *Mounting 1st display on the front panel*

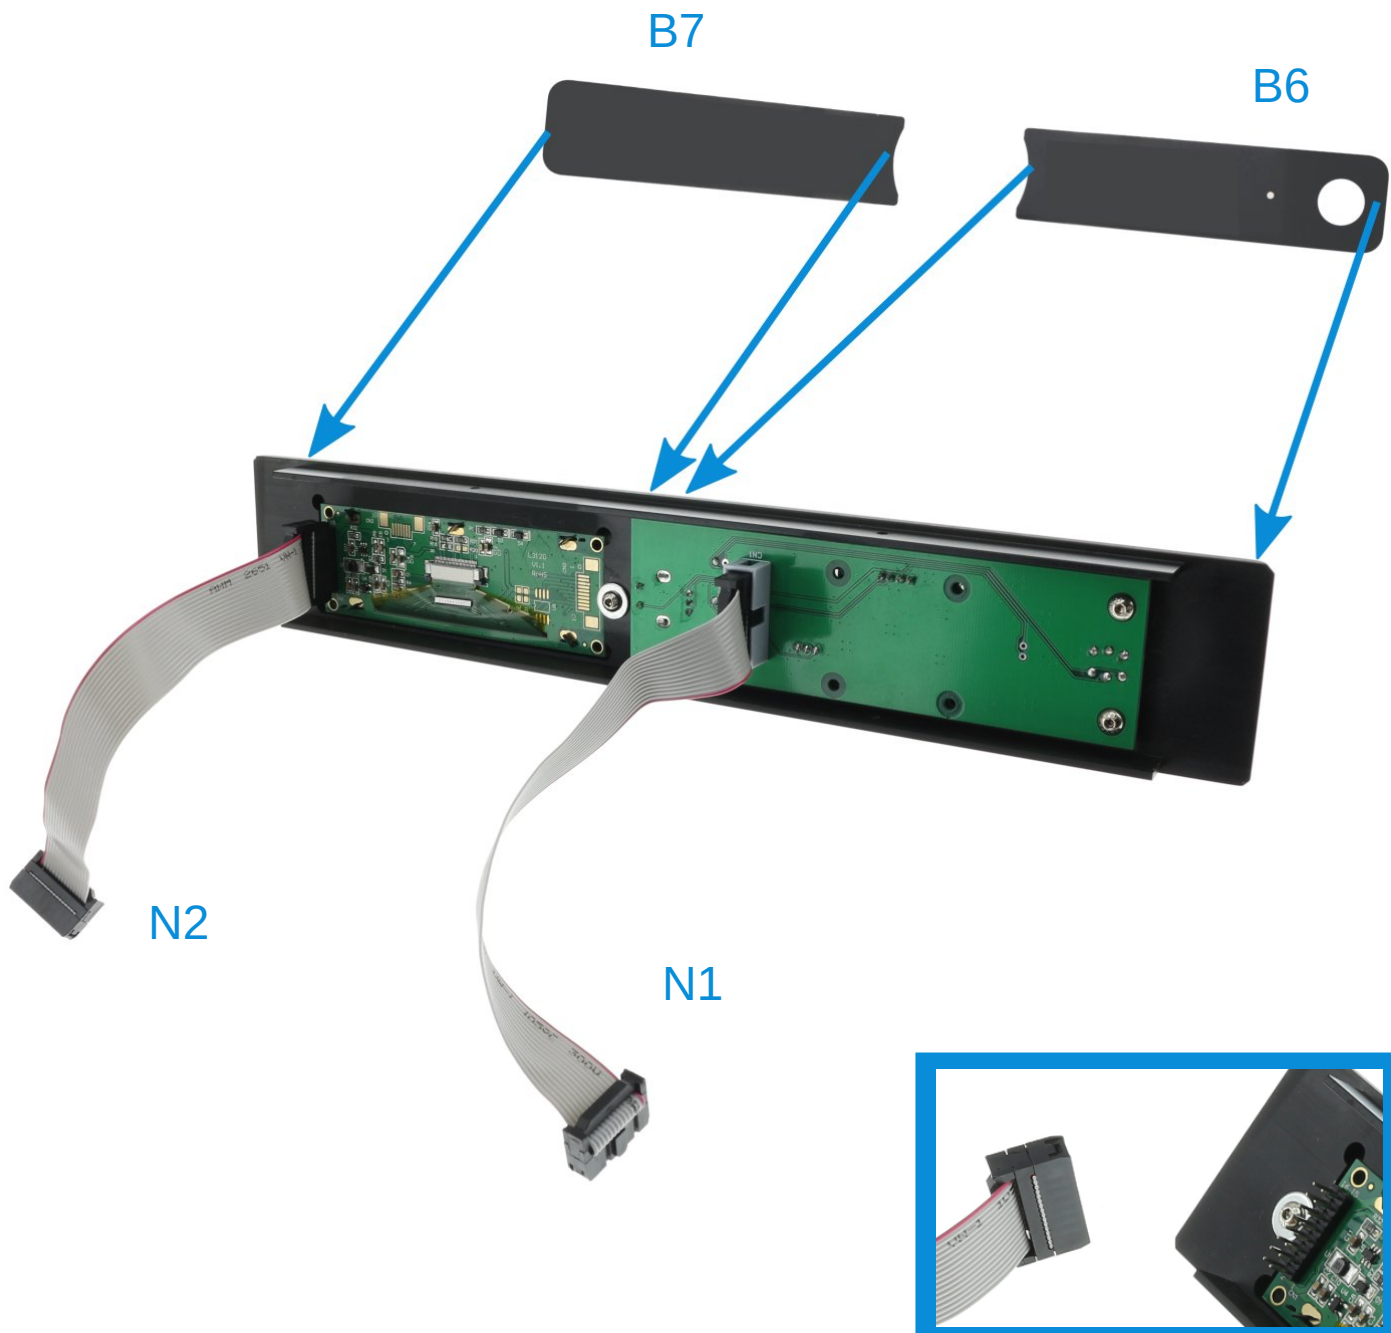

Before tightening the screws, make sure that the screen is centered and does not touch the case

Montage du PCB écran 2 en façade  
(Les rondelles R2 et vis V7 passent sur le côté du  
PCB)

*Mounting 2nd display on the front panel  
( Washers R2 and V7 screw go around the PCB )*

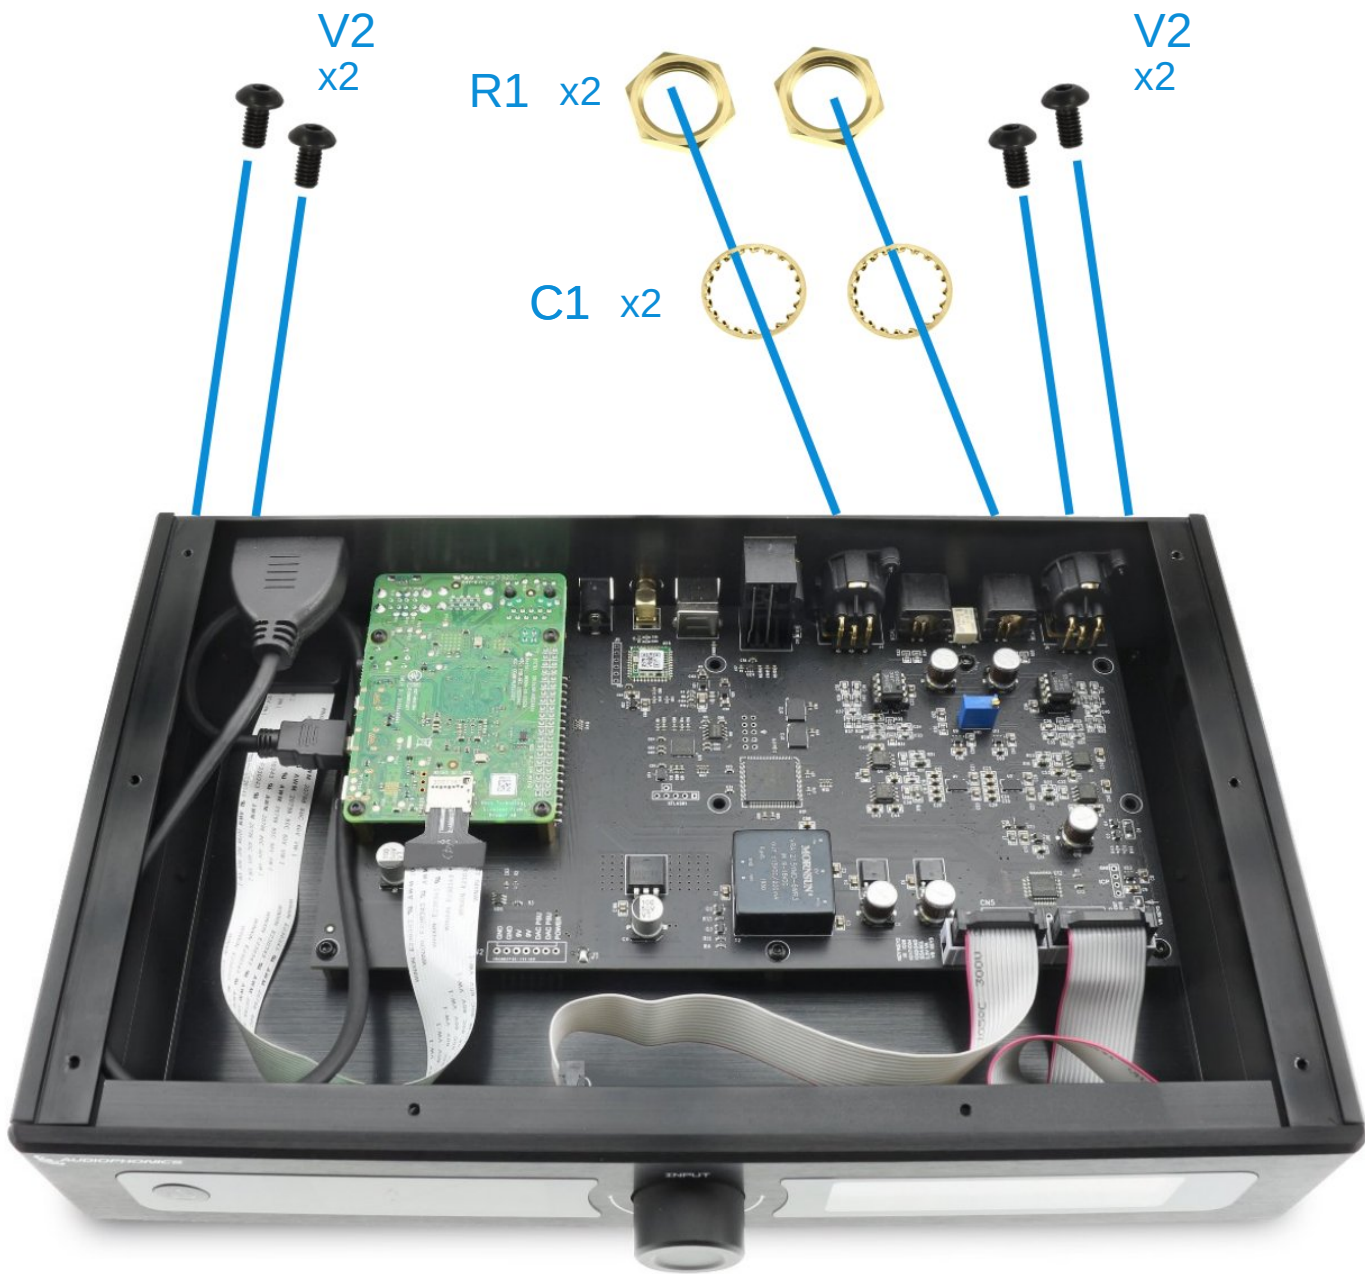

Installation des cache écran et  
branchement des nappes  
(Attention au sens de N2 : nappe vers l'intérieur )

*Installing the screen cover and connecting the displays  
(Please double check the way N2 is plugged the cable  
must be facing inward).*

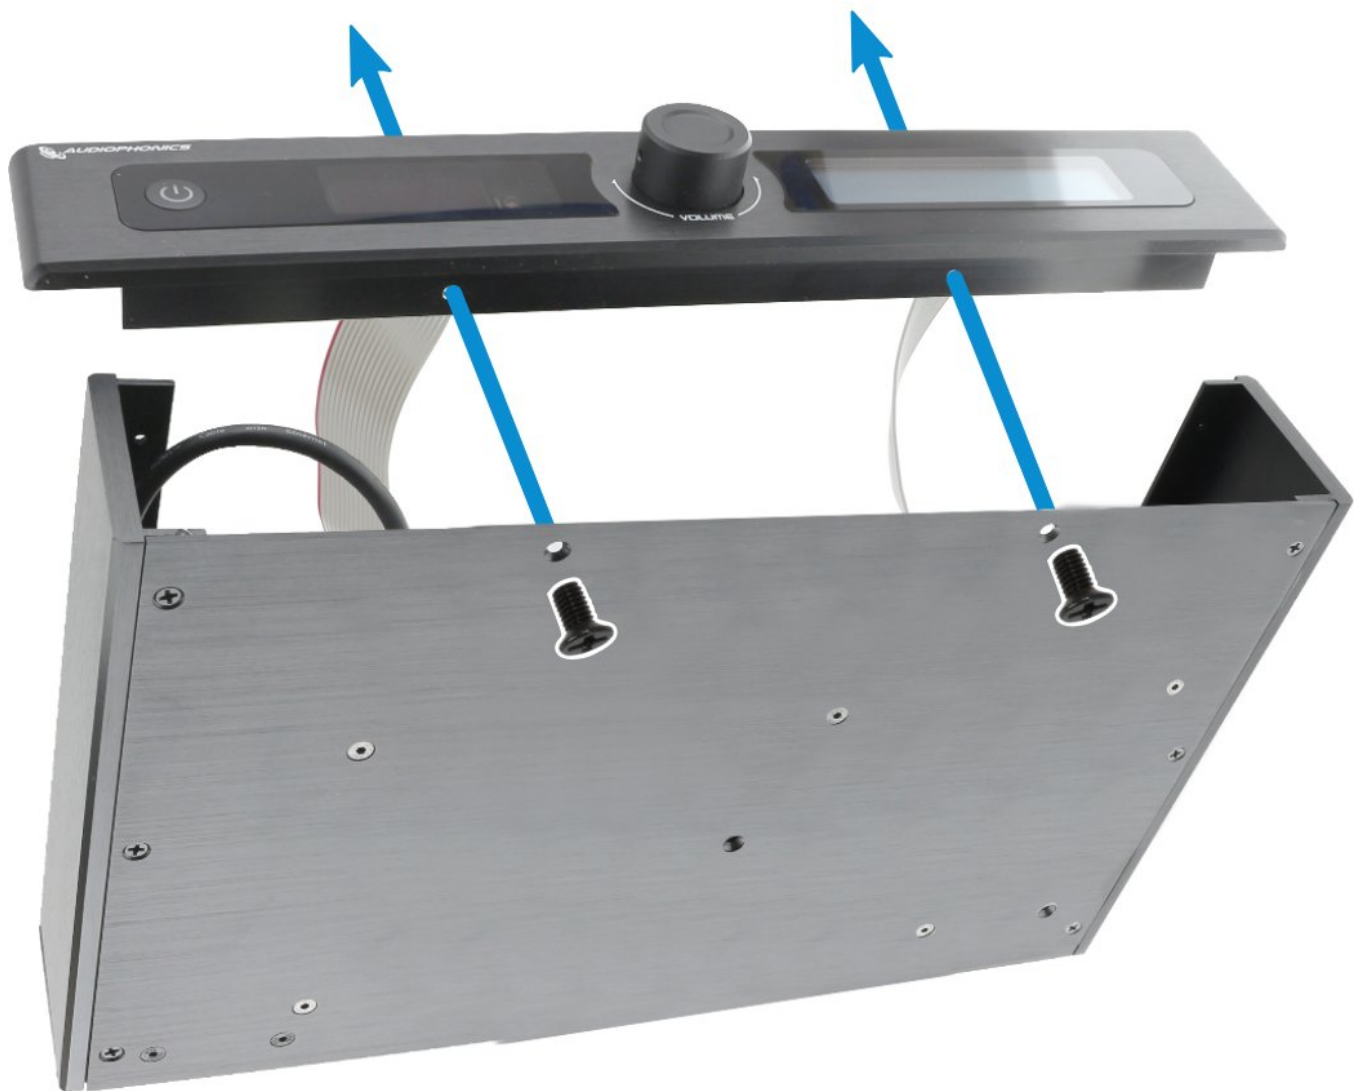

Branchement des écrans

*Connecting the displays*

Fixation du panneau arrière

*Attaching rear panel*

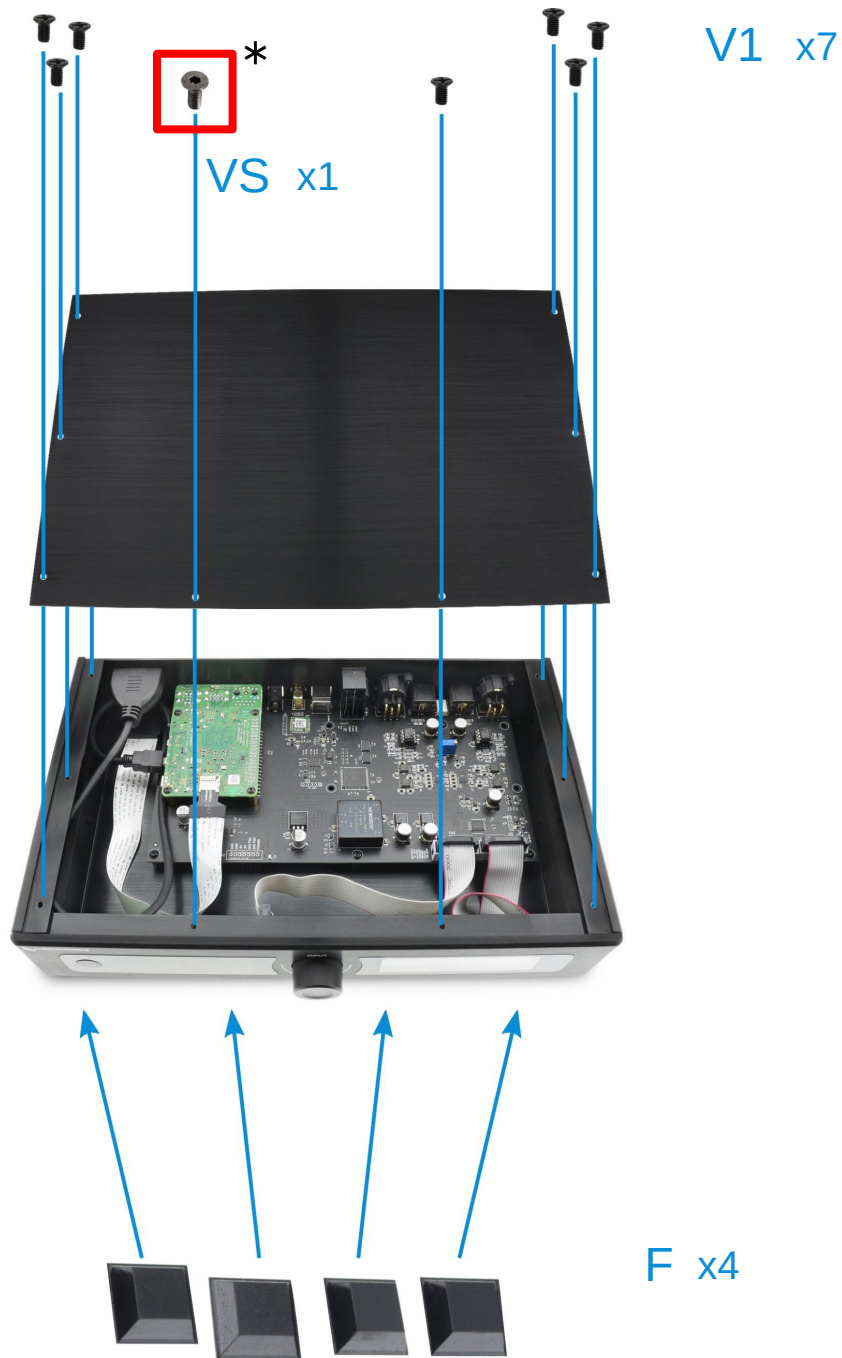

V1 x2

Fixation du panneau avant

*Attaching front panel*

## Fixation du panneau supérieur

\*Assurez vous de bien positionner la vis VS à l'endroit indiqué en rouge. Une vis V1 ne convient pas à cette position.

### *Attaching top panel*

\* Make sure you use the screw labeled VS in the position marked in red. V1 screw are not suited for this specific spot.
