
NOTICE DE MONTAGE

RASPDAC Mini OLED & LCD

Kit DAC ES9038Q2M

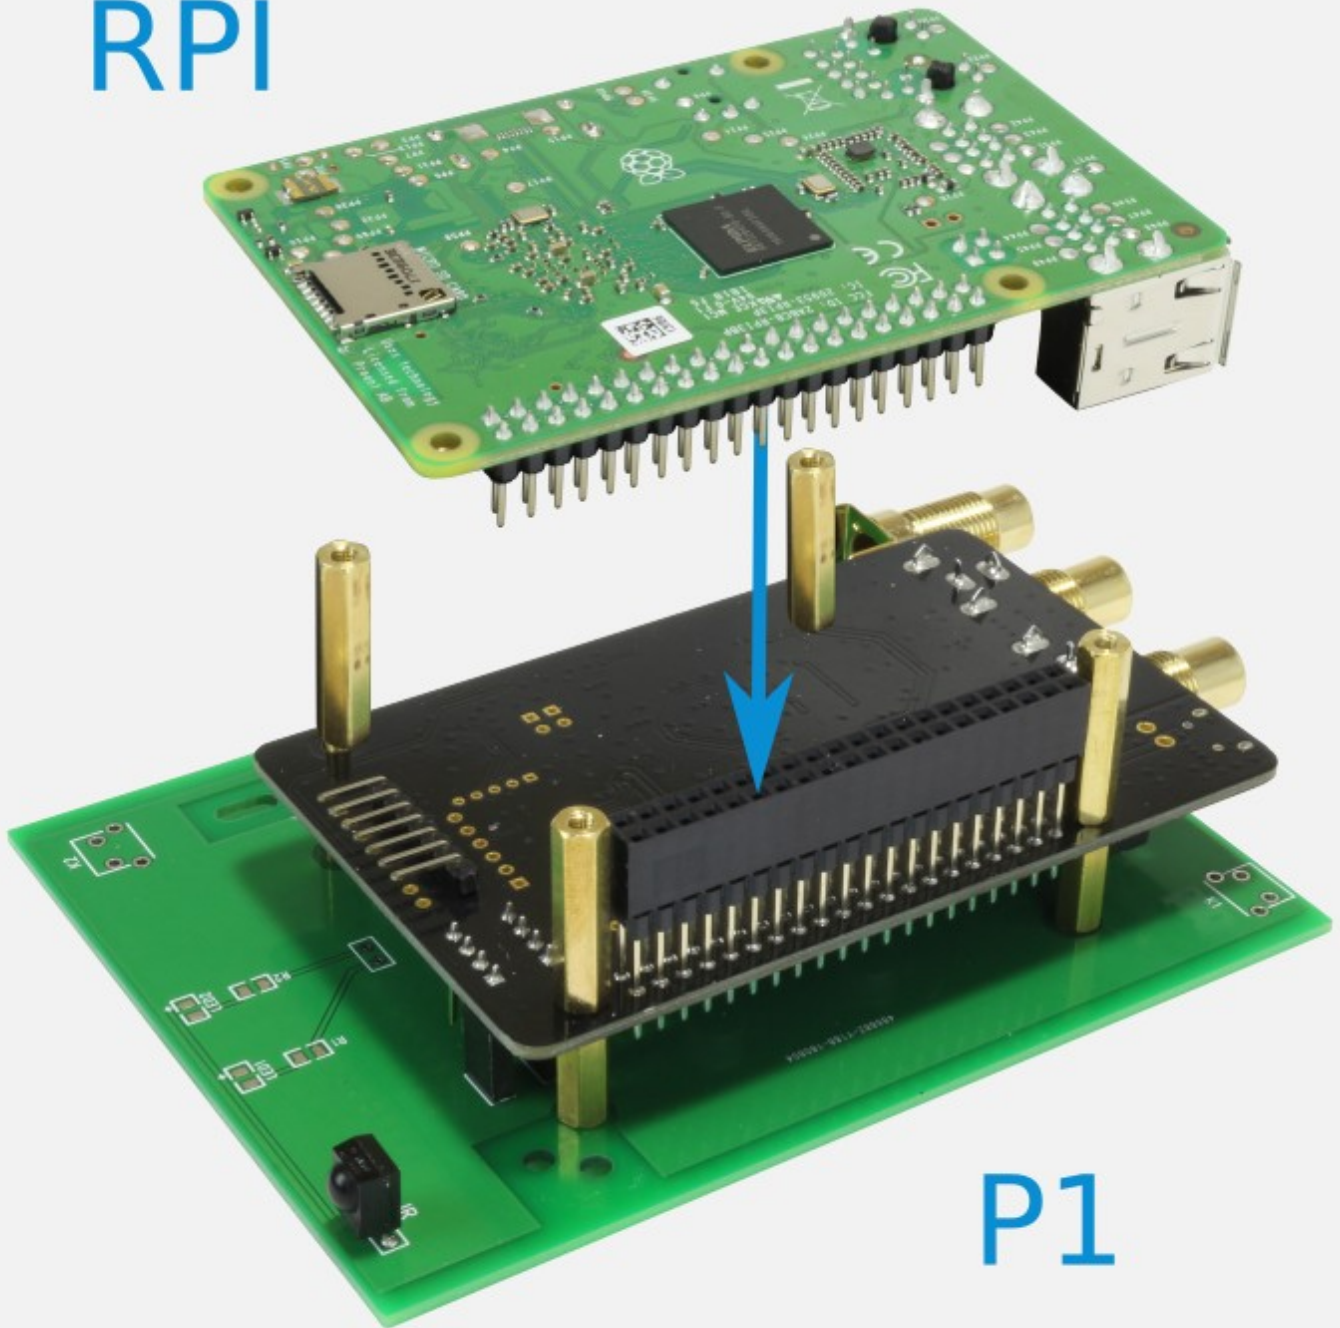

Préparation du PCB principal (P1)

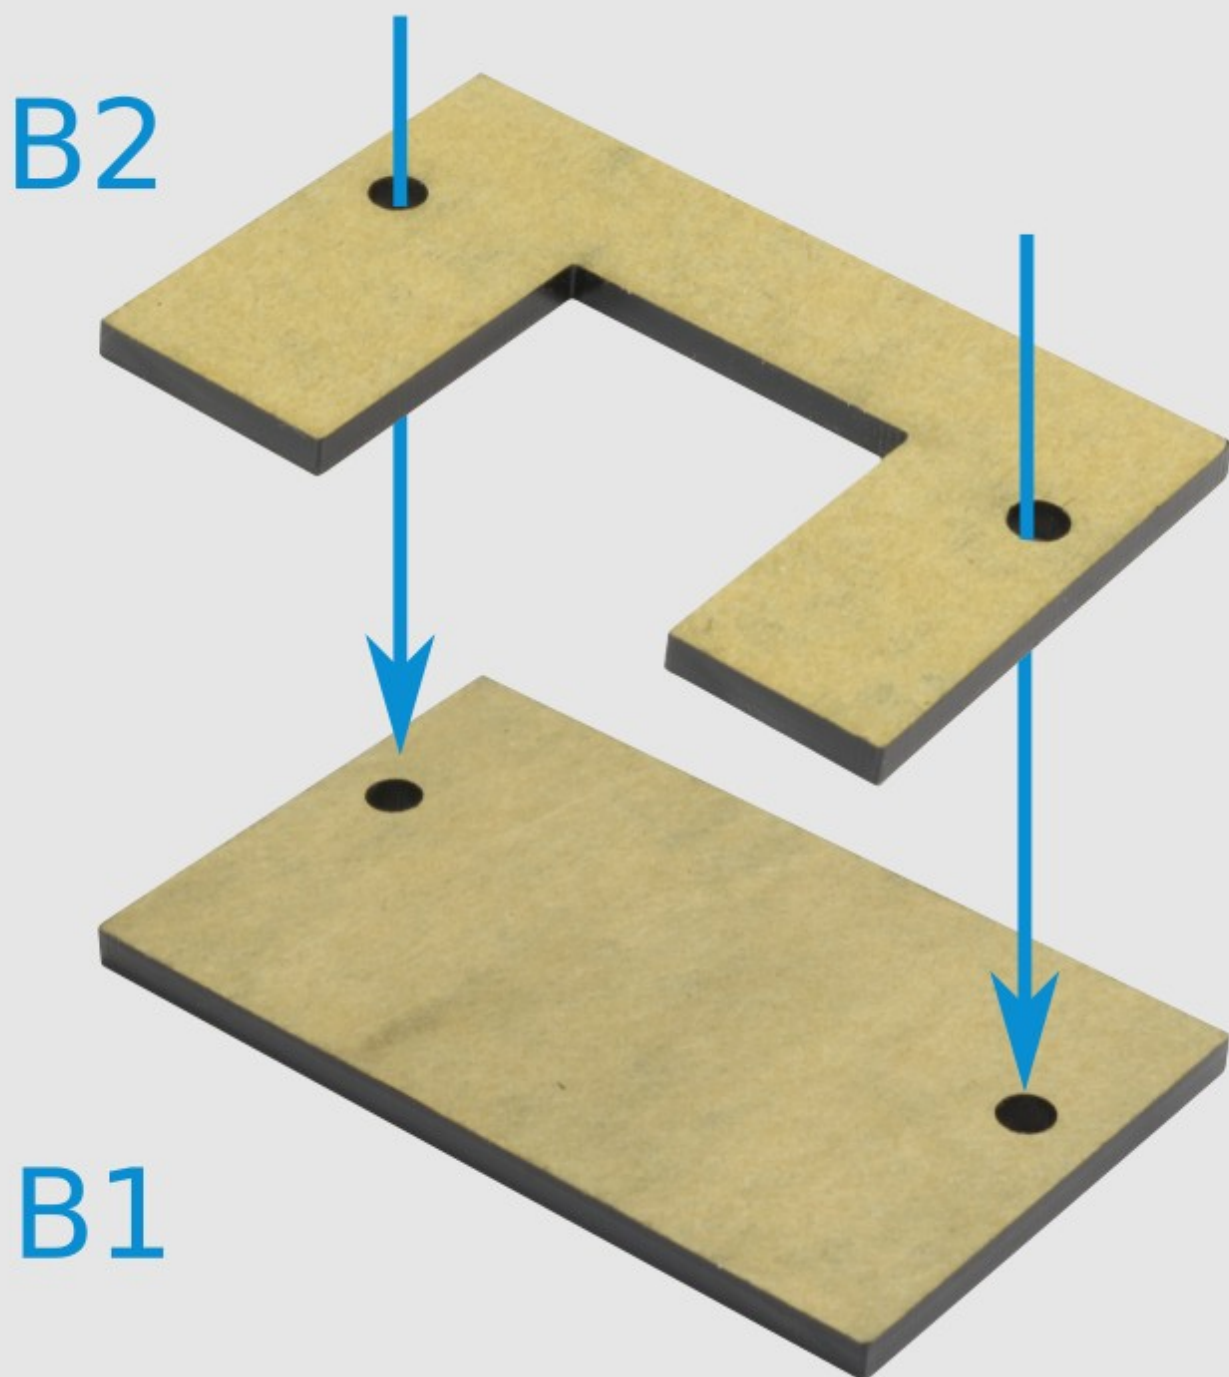

Setting main PCB (P1)

RPI

P1

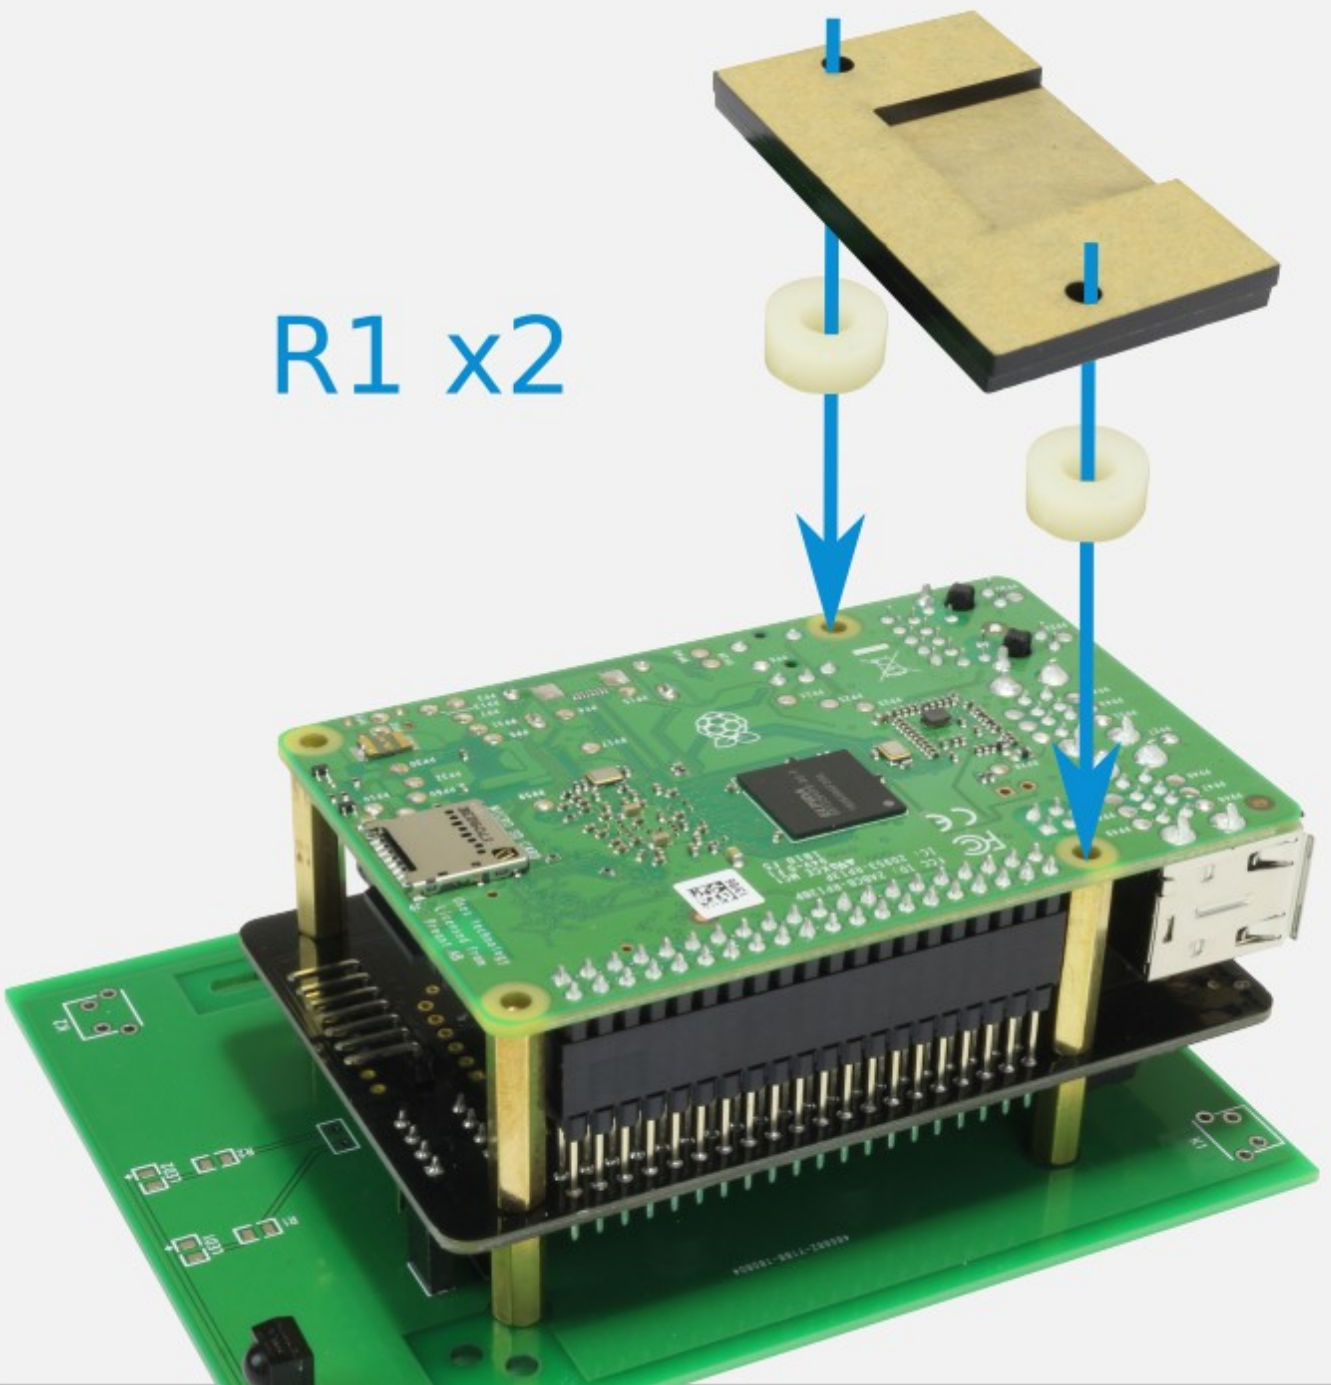

Installation du Raspberry Pi sur GPIO
Plugging Raspberry Pi through GPIO

Préparation du support du lecteur de
carte Micro-SD

Setting the support for micro-SD card reader

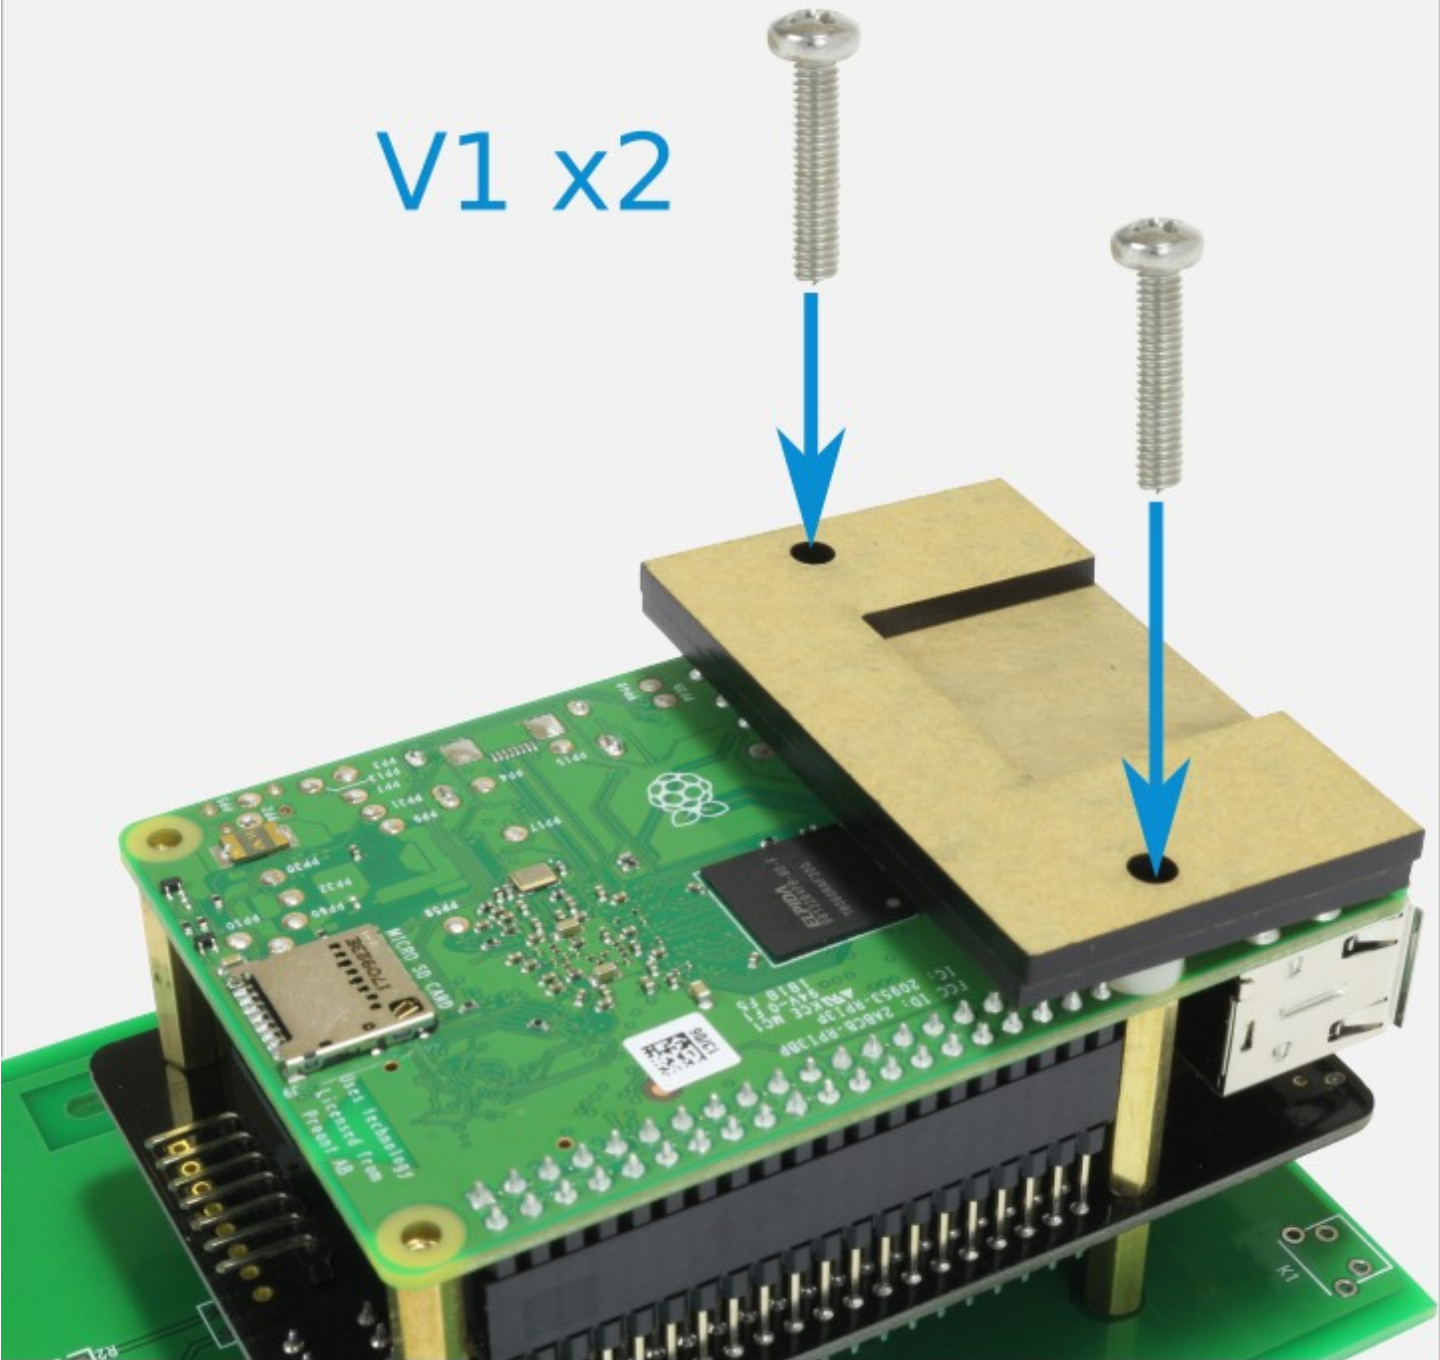

R1 x2

Installation du support du lecteur de
carte Micro-SD

Mounting the support for micro-SD card reader

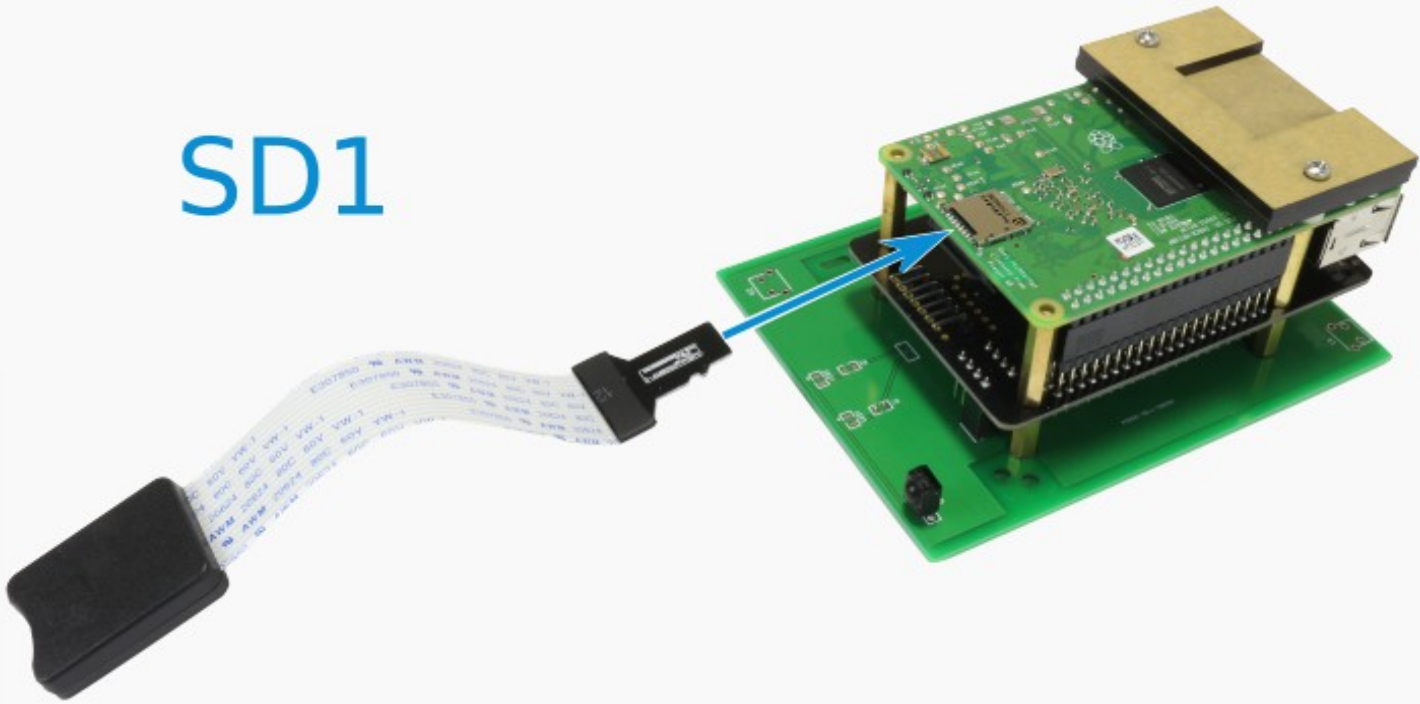

V1 x2

Installation du support du lecteur de
carte Micro-SD

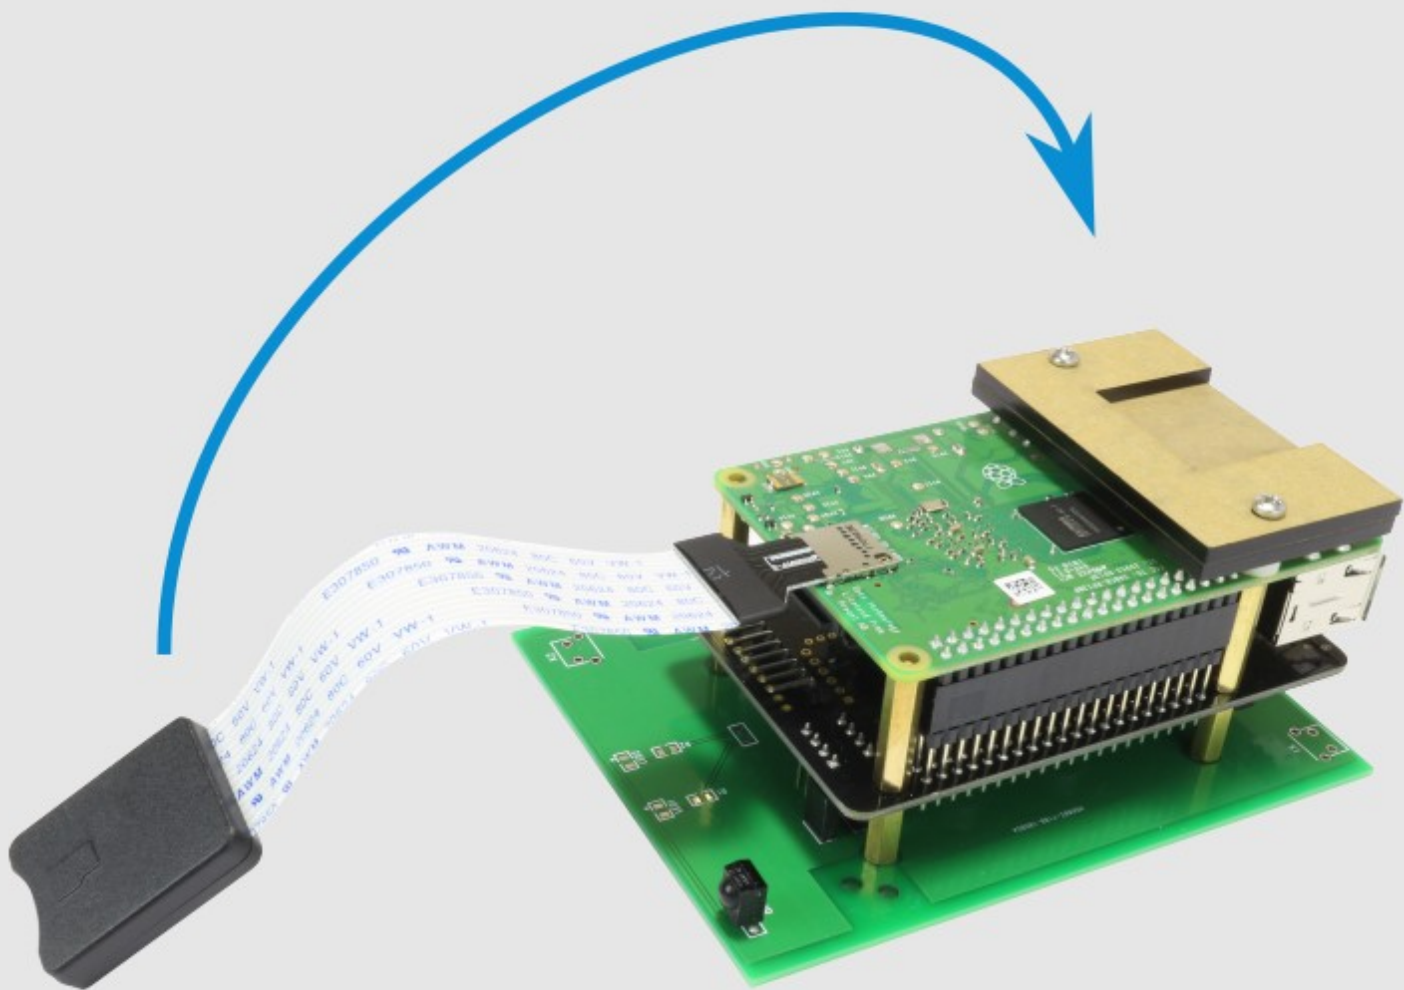

Mounting the support for micro-SD card reader

SD1

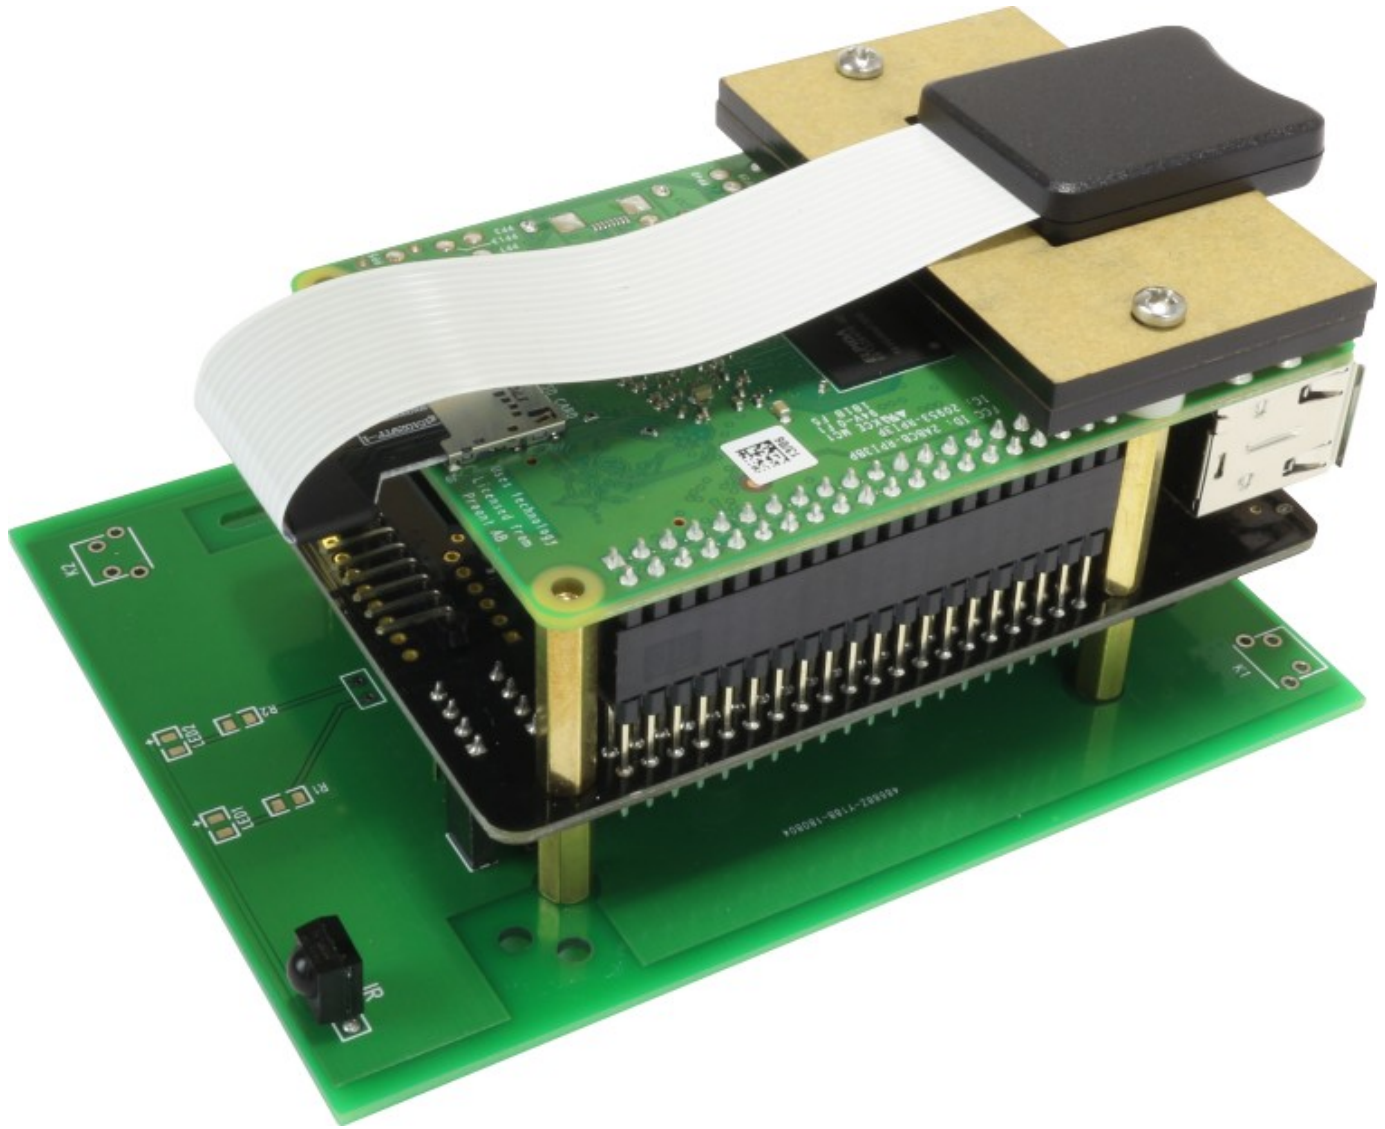

Branchement du support du lecteur de
carte Micro-SD

Plugging the support for micro-SD card reader

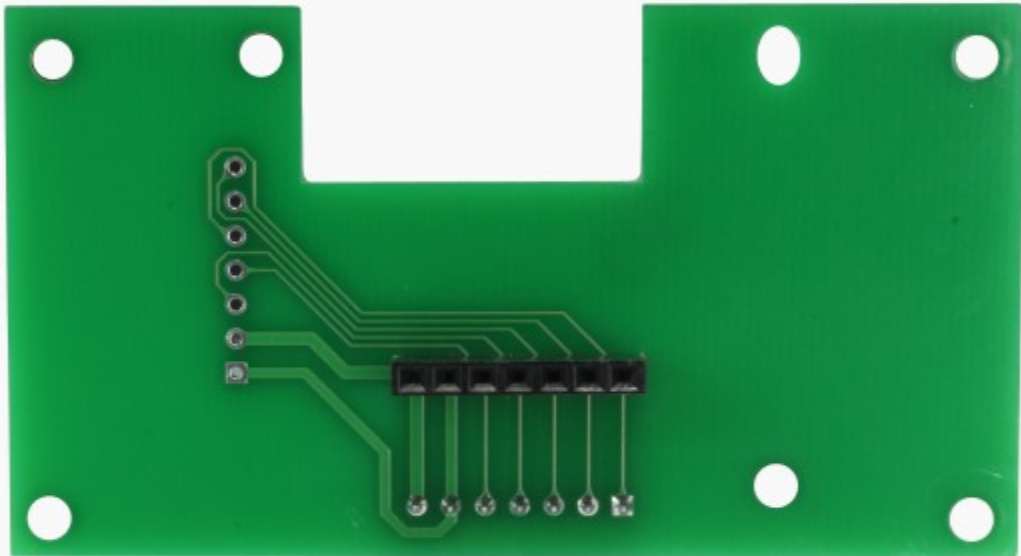

Positionnement du support du lecteur de
carte Micro-SD
Évitez de plier la nappe SD1.

*Position the support for micro-SD card reader
Please do not fold SD1 completely.*

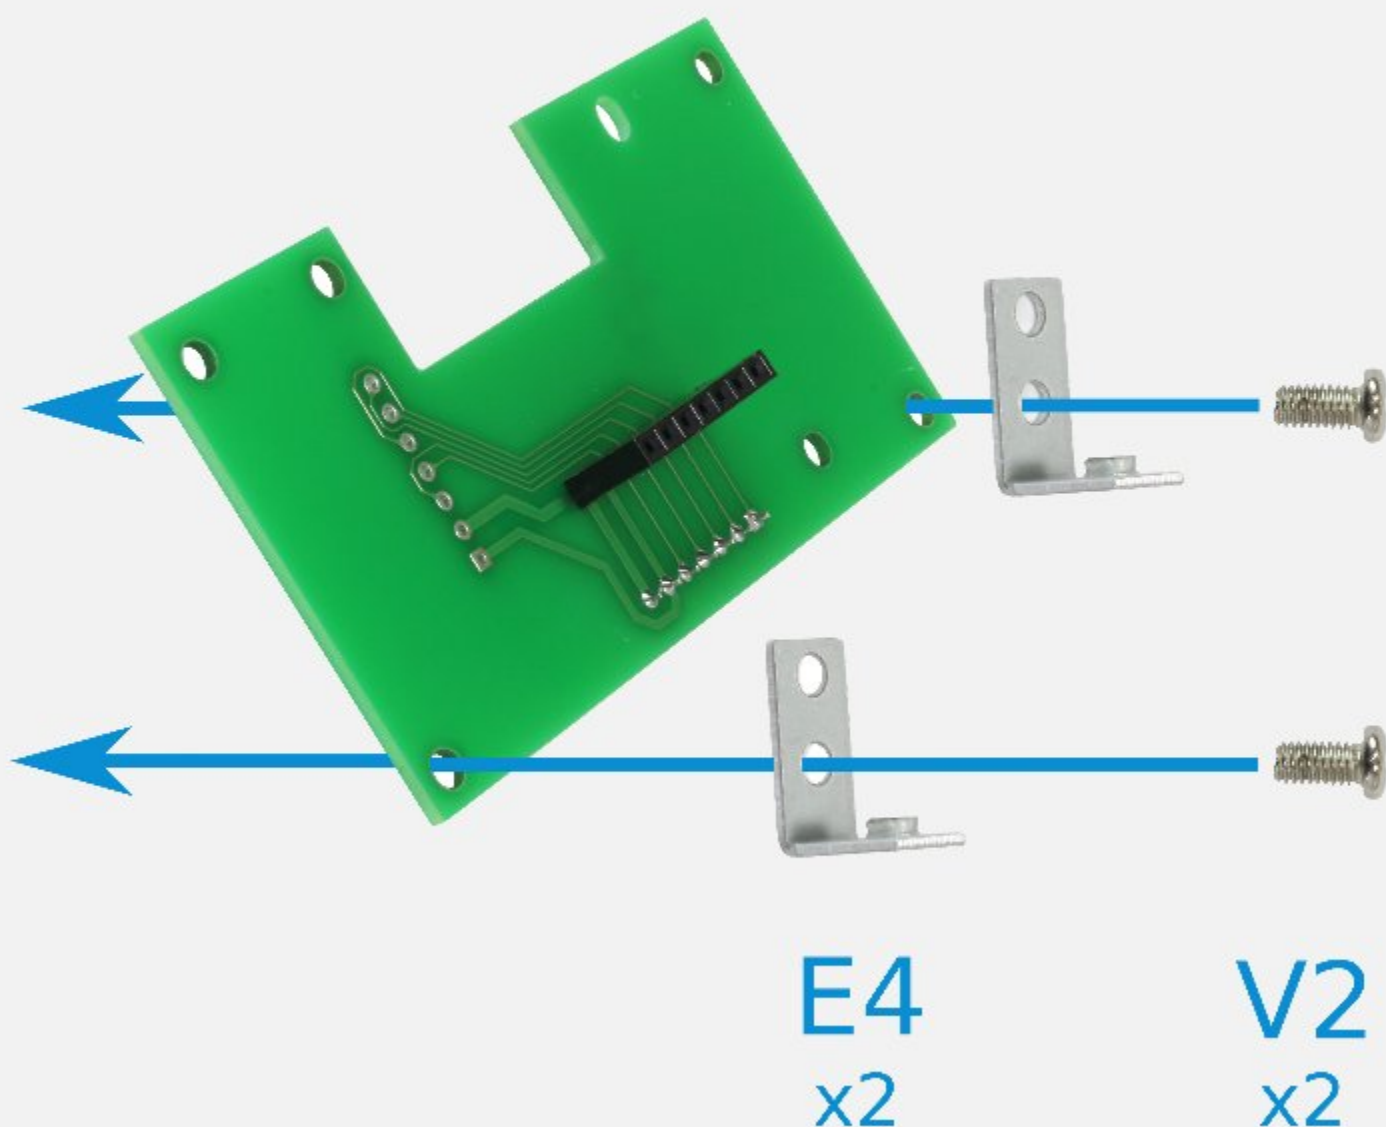

Le PCB principal est prêt
Main PCB installation is complete

P2

Assemblage du module écran
(attention au sens de P2)

*Display module assembly
(double check the PCB side)*

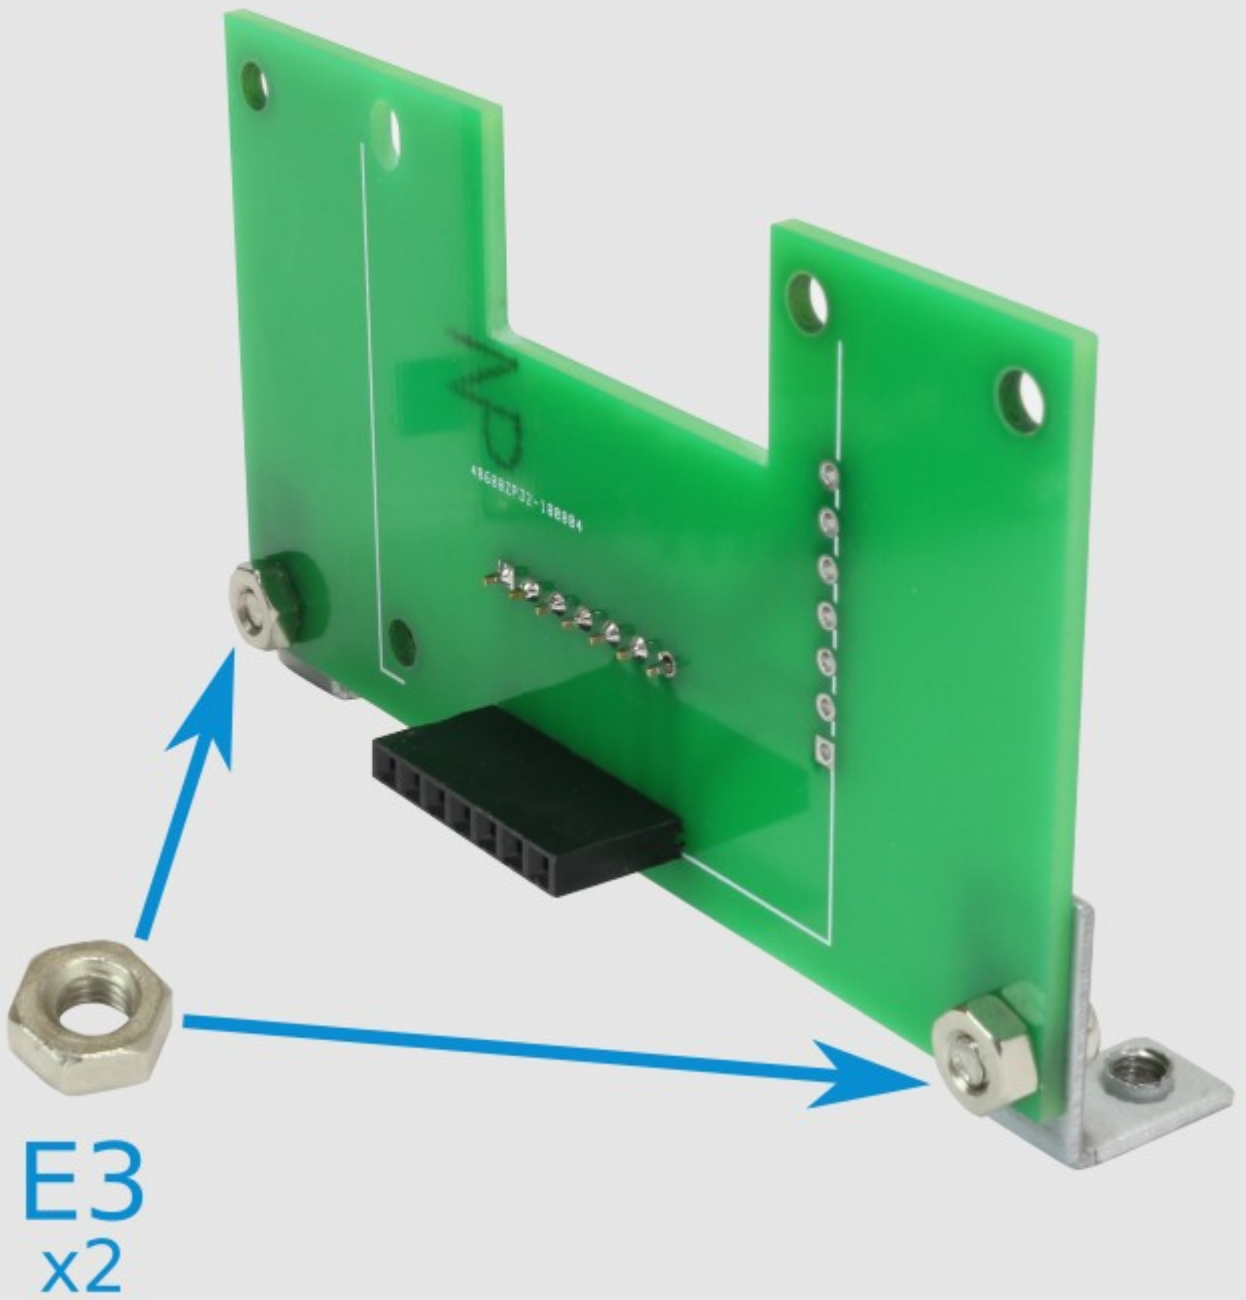

Assemblage du module écran

Pour différencier V2 et V3 : seule V3 s'adapte au pas de vis de E1 et E2.

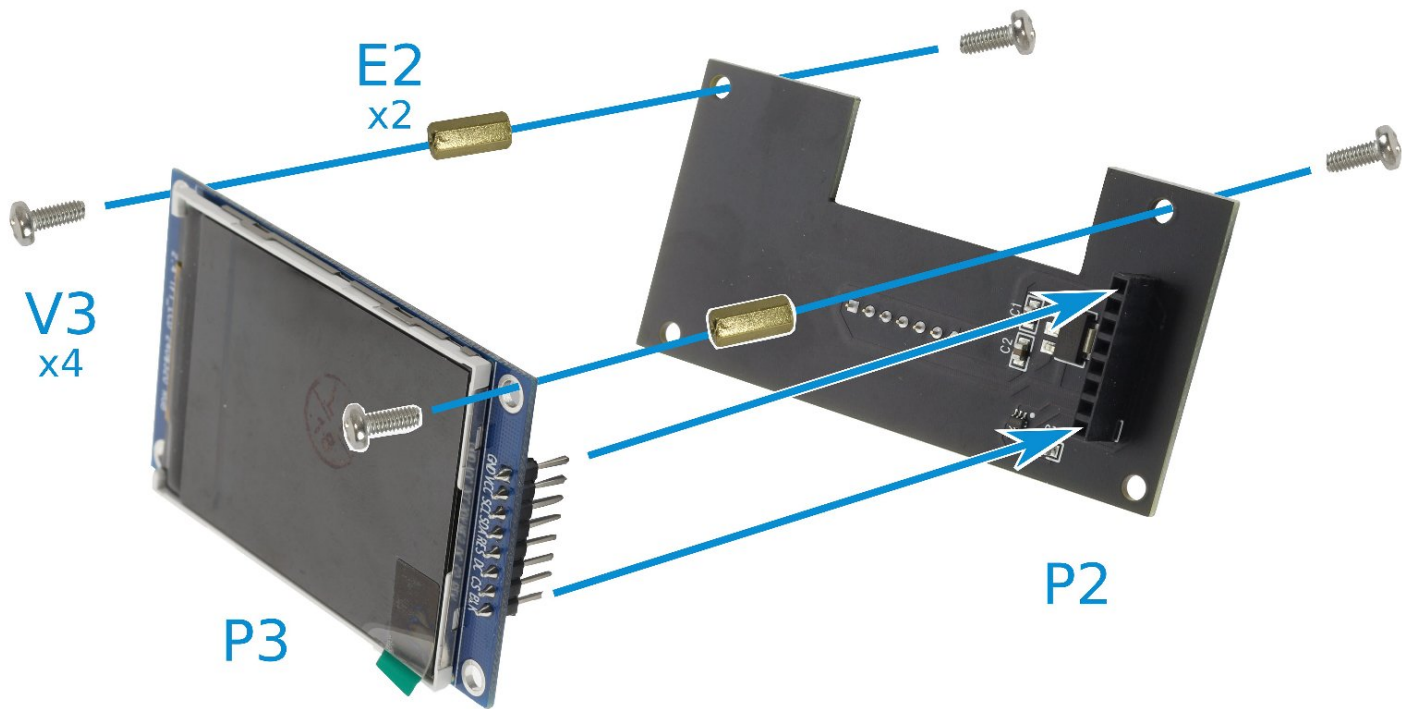

Display module assembly

If you cannot figure out V2 from V3 : only V3 fits E2/E3 screw.

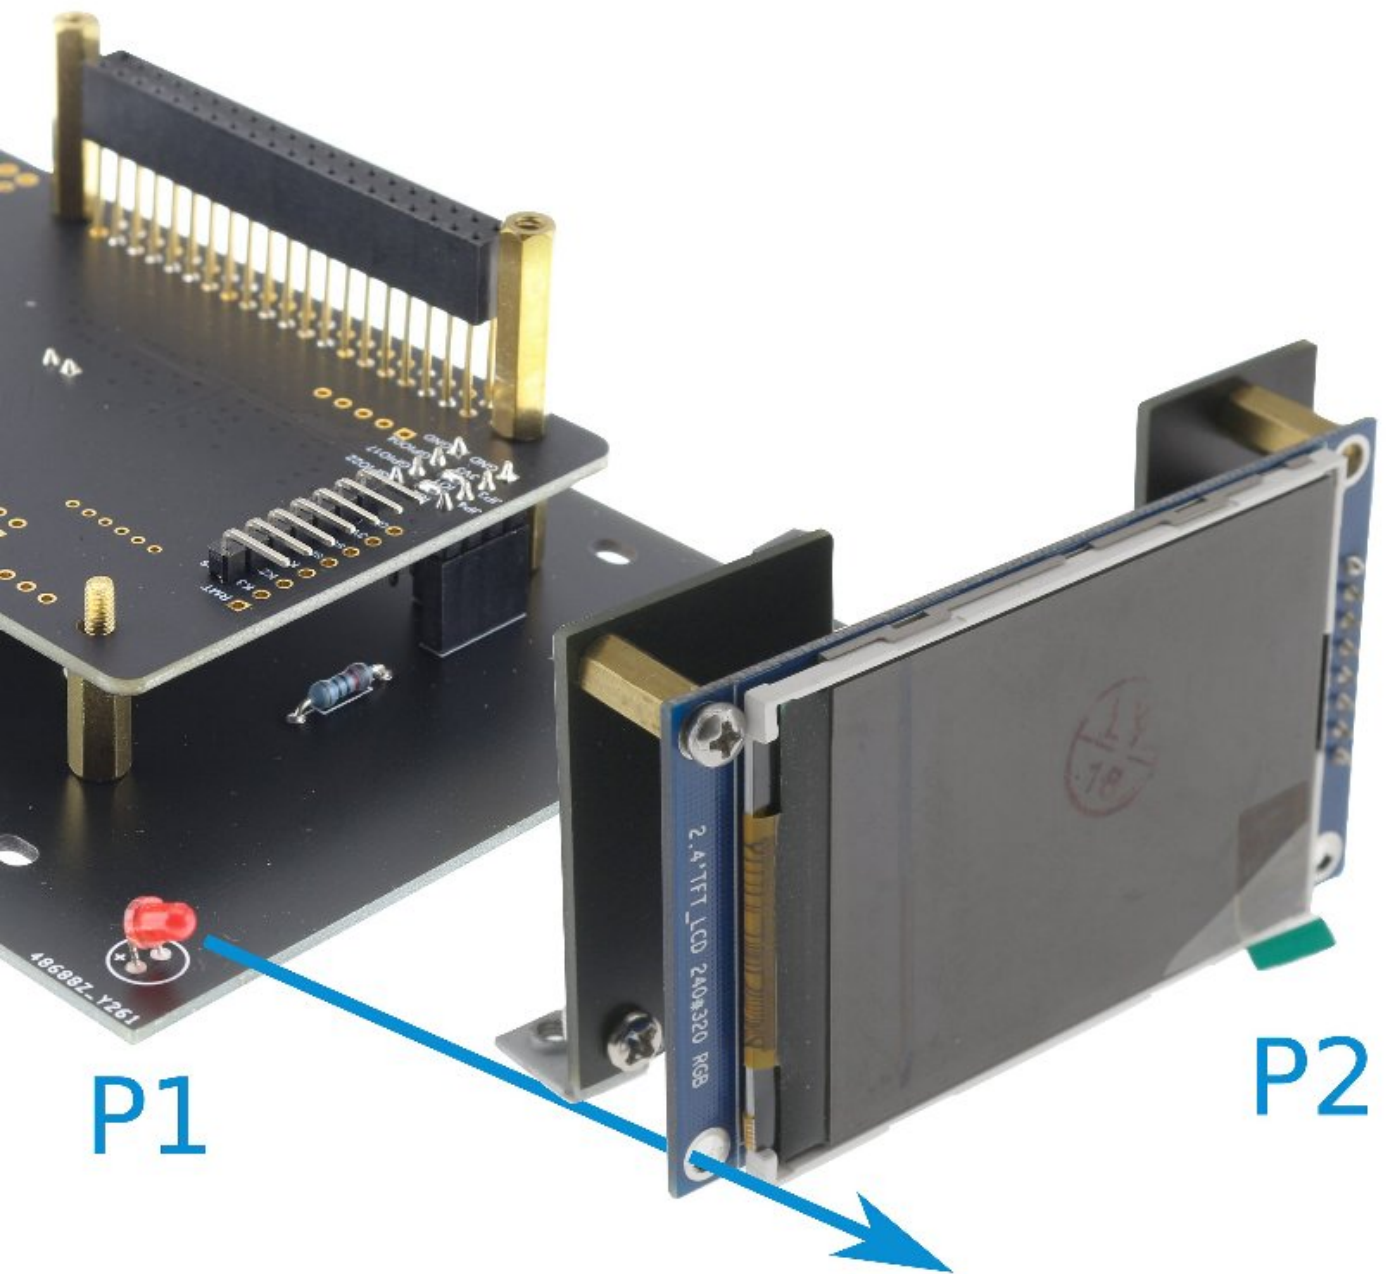

Assemblage du module écran

Display module assembly

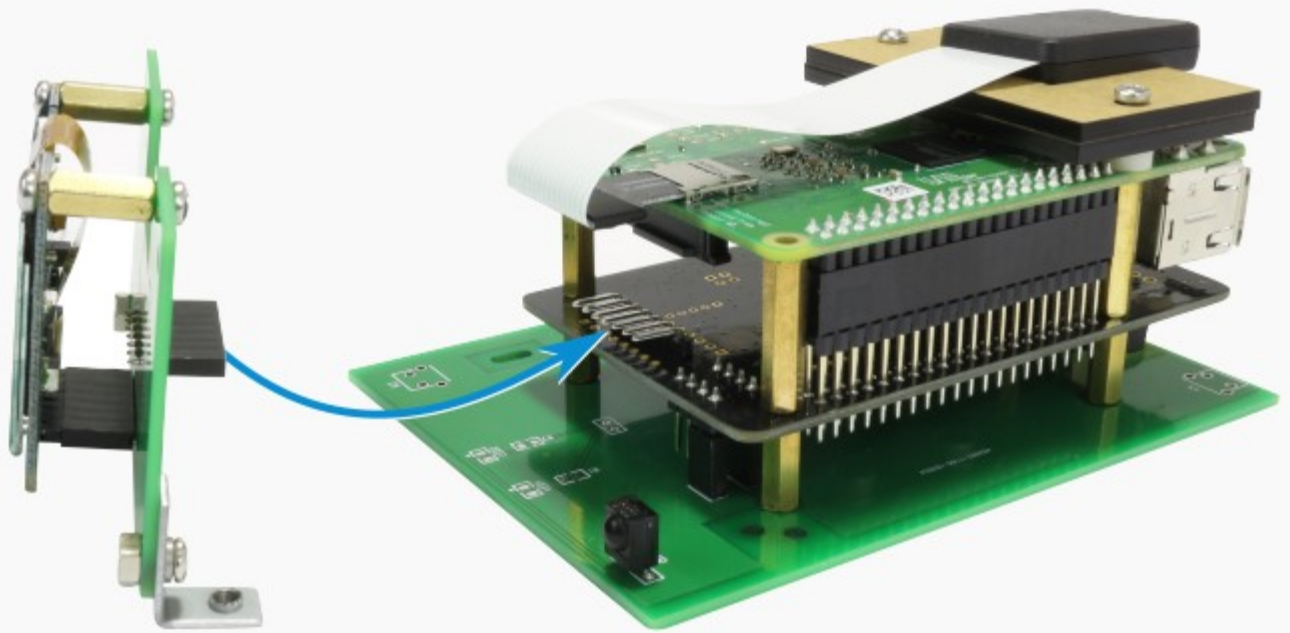

Assemblage du module écran

Display module assembly

(Version LCD) Faites passer la diode dans l'emplacement indiqué ici lors de la connexion de P2 à P1.

(LCD version) make sure the diode passes through the hole shown here when connecting P2 to P1

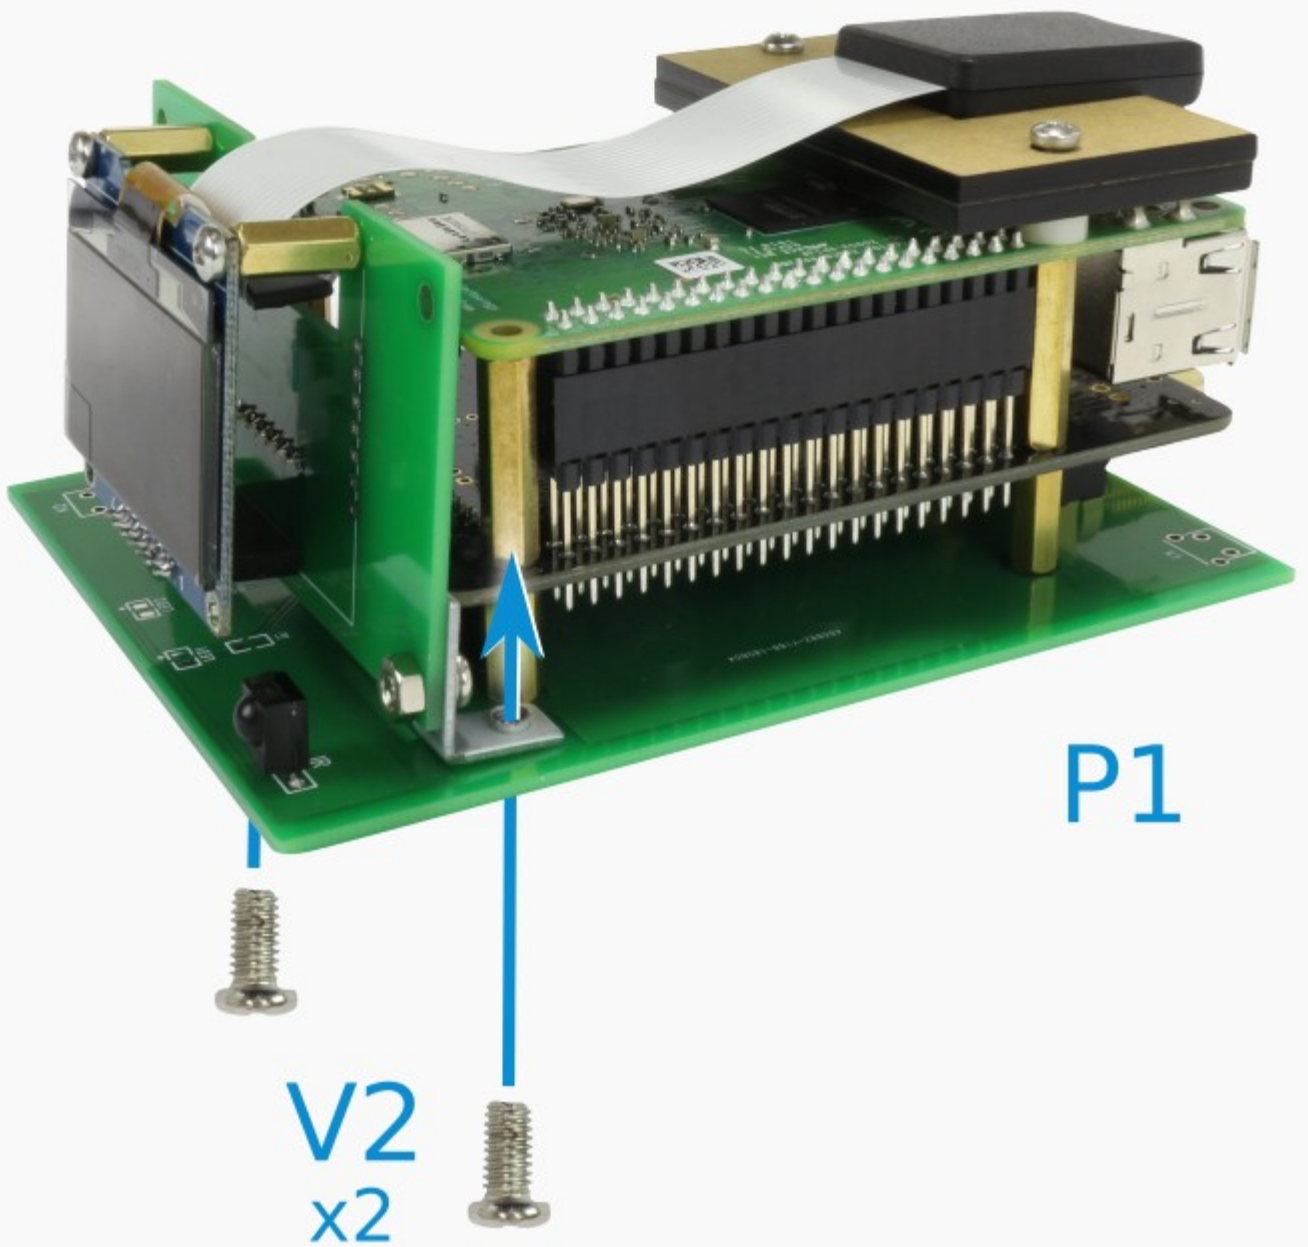

P2

P1

(Toutes versions) Assurez-vous que les pins des connecteurs P1 & P2 sont alignés.

(All versions) Make sure the pins of the P1 & P2 connectors are aligned.
