

SCP's Snug-Tite™ Grip for HDMI® Cables

The SCP Snug-Tite™ Grip keeps your cable securely connected at all times.

New Product

HDMI cable connections become loose for a variety of reasons.

These conditions can cause a HDMI cable connection to become loose, resulting in intermittent signal problems or system failure. For the professional integrator, this creates service calls, unhappy customers, and a general waste of time and money.

But with SCP's Snug-Tite™ Grip, your HDMI cable remains securely connected. Other solutions such as screw locks and locking clips are bulky and take up valuable space when connecting cables to multi-port HDMI devices. SCP's Snug-Tite™ grip incorporates the latest patented grip technology that retains its 12 lbs of grip force even after many connects/disconnects.

Ideal for mobile applications and permanent installations alike, the SCP Snug-Tite™ Grip keeps your HDMI cable securely connected for maximum signal integrity.
